Contents:

CHAPTER 1

Project Modules

1.1 teensy_minimal_rpc Package

1.1.1 teensy_minimal_rpc Package

teensy_minimal_rpc.__init__.**conda_arduino_include_path**()

teensy_minimal_rpc.__init__.**conda_prefix**()

Returns

Path to Conda environment prefix corresponding to running Python executable.

Return `None` if not running in a Conda environment.

Return type path_helpers.path

teensy_minimal_rpc.__init__.**get_firmwares**()

Return compiled Arduino hex file paths.

This function may be used to locate firmware binaries that are available for flashing to [Arduino][1] boards.

[1]: http://arduino.cc

teensy_minimal_rpc.__init__.**get_includes**()

Return directories containing the Arduino header files.

Notes

For example:

import arduino_rpc ... print ' '.join(['-I%s' % i for i in arduino_rpc.get_includes()]) ...

teensy_minimal_rpc.__init__.**get_lib_directory**()

teensy_minimal_rpc.__init__.**get_sketch_directory**()

Return directory containing the Arduino sketch.

teensy_minimal_rpc.__init__.**get_sources**()
Return Arduino source file paths. This includes any supplementary source files that are not contained in Arduino libraries.

teensy_minimal_rpc.__init__.**package_path**()

1.1.2 ADC Module

1.1.3 DMA Module

1.1.4 PIT Module

1.1.5 SIM Module

1.1.6 adc_sampler Module

1.1.7 config Module

1.1.8 node Module

1.1.9 proxy Module

1.1.10 Subpackages

bin Package

upload Module

CHAPTER 2
